

## FAST Updates June 2025

Millennium has applied some look and feel modernization updates to pinned reports, the title bar, filter options, and the Invoice Query report.

### FAST Pinned Reports

#### Previous Pinned Reports Page

The My Favorite Reports section appeared as a list. The My Pinned Reports and Grouped Pinned Reports appeared as dropdown sections.

The screenshot shows the 'Finance Reporting' header with a green bar. Below it is a 'Add New Alert' button. The main section is titled 'My Favorite Reports' and contains a table with columns: Execute, Report Name, Page Name, More Info, PDF, Excel, XML, Email, Dashboard, Scheduler, Favorite, and Delete. A single report 'Test Report' is listed with 'Summary by Acct Detail' as the page name. Below the table are expandable sections for 'My Pinned Reports' and 'Group Pinned Reports'.

Execute	Report Name	Page Name	More Info	PDF	Excel	XML	Email	Dashboard	Scheduler	Favorite	Delete
	Test Report	Summary by Acct Detail									

#### New Pinned Reports Page

Here are the key changes:

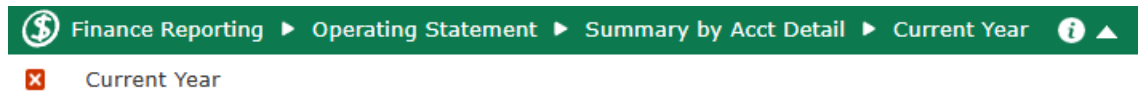

- Better pinned reports organization
  - Instead of three sections (favorites, private, group) there are now two sections: favorites and pinned reports
  - The second section can be sorted/grouped by Report or by Group
- The sections will remain open after they are expanded if you expand other sections
- Added the menu path to the info icon hover dialog
- Clicking on a Pinned Report will open in a new browser tab
- When searching, the search criteria will remain in the textbox after clicking the Search button to make it easier to refine the criteria

The first screenshot shows the 'Pinned Reports' section with a 'Sort By' dropdown menu. The 'Group' option is selected and highlighted with a red box. The second screenshot shows the same interface but with the 'Page' option selected and highlighted with a red box. Both screenshots show the 'My Favorite Reports' section expanded, displaying a list of reports under 'Summary by Acct Detail - Current Year'.

## FAST Updates June 2025

### FAST Title Bar

The page title bar now displays the menu path instead of the title and description. If a description is present, an info icon  will appear, that when clicked, will display the description.

### New Select Filter Controls Button

Added a "Select Filter Controls" button to the Filter Options tab on reports. This allows individual filter controls to be hidden to declutter the interface if certain filters aren't needed all the time or are not relevant on specific reports.

### New Columns Added to Invoice Query

On the Invoice Query report, the "Amount" column has been split into two columns: "Current Amount" and "Cancelled Amount."

Row #	Chart	Fiscal Year	Vendor ID	Payee Name	Current Amount	Cancelled Amount
1	U	2026	100XXXXXX	ABC Company	0.00	703.99

The "Cancelled" (Y/N) column has been added when you drill down on a Payee to the Invoice Query Details report.

Vendor ID	Payee Name	Invoice	Date	Payee Invoice	Cheque #	Chart	Fund	Orgn	Acct	Prog	Actv	Locn	Amount	Cancelled
100XXXXXX	ABC Company	IXXXXXX	 01-04-2025	12345	!1234567	U	1XXXX	1XXX	1XXXX	1X			703.99	Y
