

Announcing an educational program you won't want to miss!

Gentle Persuasive Approaches (GPA®) in Dementia Care: *Supporting Persons with Responsive Behaviours*

GPA Basics is a 7.5 hour evidence-informed education session designed for team members who care for older adults who display responsive behaviours associated with dementia. GPA is taught Canada-wide to care providers across various sectors. Learners complete four modules which include interactive exercises, creative multimedia, and reflective learning. Learners gain purposeful knowledge and develop skills that can be immediately used at the point of care.

Location: Virtual

Date: Please consult Eventbrite offerings

Look what people are saying about GPA...

"Everyone in dementia care would find this useful"

"Very valuable tools taught in a sensitive and mindful way. Very informative, practical."

"It's very informative and makes you reflect on how you are doing [...] in regards to handling patients with dementia"
