

Appendix A

 	<p>Proposal for Summer 2025: For this proposal, we will enroll students in two-week sessions comprising one week of ESL instruction and one week of science, technology, engineering, math, and art course programming. We will offer a total of eight two-week sessions. The ESL curriculum will remain consistent across all sessions, while the science, technology, engineering, math and arts programming will vary. During the technical sessions, students will explore robotics, engineering, 3D design, industrial design, python programming, gaming, music and video production, and filmmaking.</p>	NEW
