

CURRICULUM AND PROGRAM REVIEW COMMITTEE

Report to Academic Council
at its meeting of October 18, 2011

FOR INFORMATION

1. Program Reviews – Final Assessment Report for 2010-11

In accordance with UOIT's Quality Assurance Framework, the Committee reviewed the reports and recommendations for the following three programs that underwent a cyclical review to ensure that they meet provincial quality assurance requirements and to support their ongoing rigour and coherence:

- Bachelor of Education
- Bachelor Science in Applied and Industrial Mathematics
- Bachelor of Science in Forensic Science

Each review involves an examination, by both program faculty and staff and outside reviewers, of the program's goals and requirements, its curriculum content, structure, modes of delivery, and assessment of student learning, and its use of available resources to support the program. Their work has generated a valuable set of documents that reflect a great deal of care and attention to the ongoing development and refinement of programs that best meet the needs of students and best represents the current state of each particular field of study. The Committee commends all Faculty and staff who contributed to these program reviews for their important input into the process.

The attached report provides an overview of the outcomes of the recommendations resulting from the program reviews, identifies particular strengths of the programs as well as opportunities for improvement and enhancements, and outlines the agreed-upon implementation plan. The detailed reports and recommendations may be reviewed in the Secretary's office.
