

## **Gary Rose**

Gary is currently the Vice President of Planning and Project Controls for the Nuclear Projects organization including the Darlington Refurbishment Program. Gary has been involved in this program since 2008 at which time he was on the team that prepared the initial feasibility estimate and business case to refurbish Darlington. Since that time, he has led the planning effort that culminated in provincial approval to proceed with the project earlier this year.

Gary has worked for OPG for over 28 years. He started his career in Finance and held a number of positions in Corporate Accounting until 2003.

In 2003 Gary joined Nuclear and worked on the Pickering A Return to Service project in a Finance and Project Controls capacity. He has been involved in project planning, project controls, and related strategic initiatives and activities in Nuclear since that time.

Gary is a CPA (Chartered Professional Accountant), holds a Bachelor of Commerce degree and a Project Management Professional designation. Gary is also the Vice-Chair of the Construction Industry Institute's "Product Review Board".

Gary lives in Whitby with his wife and three boys. When not working, he is likely at a hockey rink with one of his boys.
