

**G. Glenn Case, P. Eng.,**

Glenn is Senior Technical Advisor with the Port Hope Area Initiative Management Office, a branch within Canadian Nuclear Laboratories (formerly Atomic Energy of Canada Limited) specifically tasked with the delivery of the Port Hope Area Initiative. He is a Chemical Engineer and a registered professional engineer in the Province of Ontario.

Glenn has been involved in the Port Hope low-level radioactive waste issue since 1976. He began his involvement as the on-site project engineer for the Port Hope Radon Reduction and Radioactive Contamination Clean-up project during the period of 1976 to 1981. From 1982 to 2000 he was involved as a technical specialist in the various conceptual design and facility siting programs. In 2001 he joined AECL to assist in the detailed design, regulatory review, licensing and construction of the long-term waste management facilities for Port Hope and Port Granby, which he will provide an overview of today.
