Mental Health and Tomorrow’s Workforce
UOIT Mental Health and Wellness Study

- Partnership with CMHA-Durham
- Seed grant from Ontario Trillium Foundation
- Describe the prevalence of depressive symptomatology, anxiety and stress in enrolled undergraduate students at UOIT-FHSC
- Determine the association between mental health, sociodemographic variables, physical health and lifestyle factors
- Feasibility study - March 2017
- In-class survey in classes
- 80% participation
- Very positive student engagement
Depressive symptoms: 20%
Anxiety symptoms: 37%
Stress: 31%
Coping: 33%

Figure 1: Percentage of the 137 responders that answered the mental health questions from the World Health Organizations’ Model Disability Survey [1]. Questions asked: “Please think about the last 30 days, taking both good and bad days into account. For each question please tell me how much of a problem it is for you on a scale from 1 to 5. 1 means no problem and 5 means extreme problem”.
Opportunity for Prevention...

Mental Health & wellness

- Physical Health Comorbidities
- Sleep Quality
- Food Insecurity
- Physical activity
- Socio-demographic variables
- Substance use
We Are Only at the Staring Line…

Next Steps:

- Large survey of the Faculty of Health Sciences graduate student population (Oct. 2017)
- Funding application for a cohort study
- Engage community partners
- Work with UOIT administration to identify potential prevention strategies
- Continue listening to our students!
