

Updates to Kaltura Video Player: V7

1 Kaltura Video Player is being updated

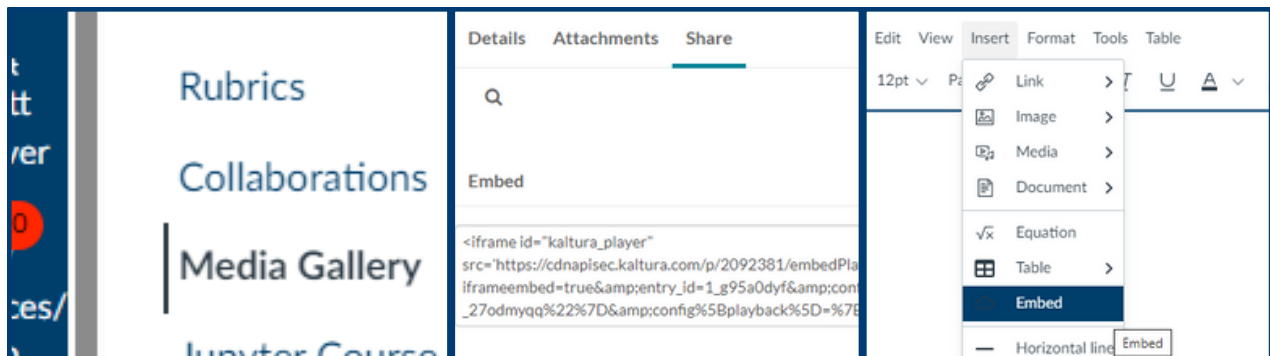

The great features we have will remain much the same; the player (the wrapper around closed captions and other features can be enabled while viewing) will be updated in the coming weeks for a smoother experience.

For an interactive comparison between the current video player and V7, go to: <https://corp.kaltura.com/v7-comparison-tool/>

2 What do you need to do?

The update will automatically be applied. The current V2 player will still function, but support will no longer be provided. To update Kaltura videos that are already embedded to the new V7 player, copy the embed code and re-embed the video in your page. Navigate to: 'Media Gallery > Your Video > Share > Copy Embed, and then Paste on your Page.'
