There are many obstacles to a good life for people with intellectual disabilities. This is the story of two individuals who are making their way in the Ottawa community. Moira Fuenzalida has a past that includes her family fleeing persecution by the Pinochet regime in Chile. Caroline Matte suffered

Researchers Get Visual at LiveWorkPlay!

Wednesday, 09 October, 2013 14:54

Written by Keenan Wellar

Aaron Johannes-Rosenberg became familiar with LiveWorkPlay through social media. After many online conversations involving his work at the Spectrum Society for Community Living in Vancouver, Aaron became interested in how he might spend some time with LiveWorkPlay members for his thesis at Athabasca University, where he is part of the Masters of Arts in Interdisciplinary Studies program. He recently visited LiveWorkPlay and hosted a focus group (see below).

Ann-Louise Davidson at Concordia university has a long history with LiveWorkPlay dating all the way back to the On Our Own Together projects in 2003-2004. She is now an Associate Professor and Graduate Program Director in Educational Technology at Concordia University. As part of a team with researchers Stefanie Corona and Christine Hannum, Professor Davidson interviewed LiveWorkPlay members and produced videos for “Project Capabilities” which are now hosted on YouTube.

Pedagogical Integration of Digital Technologies

ePearl: The evolution of teaching approaches through the use of an electronic portfolio

Research question:

- Can the use of ePEARL engage teachers in a reflection about their pedagogical practices and their perception of student learning?
- Can this reflective process help inform teacher education programs?

Focus group questions

- What pedagogical activities did you do with ePearl this year?
- How frequently did you do these activities?
- How difficult/easy were these activities?
- Do you think they had an impact on learning?
- Do you think they had an impact on your pedagogical approach?
